Full-Stack Development

— DESIGN —

Simple. Clean. Bold. Elegant. Modern. Vivid.

UI/UX

Modern, trending and customized User Interfaces with interactive and practical User Experience design incorporated.

Logos

The focal point of branding, a good logo can separate your business from the pack, just by first glance.

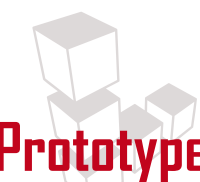

Icons

Icons are all the rage, they can express

Wireframing

Getting a project off the ground could require a wireframe, whether you need a quick sketch, or a detail oriented layout, I can do both.

Prototypes

Pick and choose what works before the launch of development, you can get a fair representation of how your website/application is going to look and feel.

Collaboration

Technology encourages collaboration at all levels of production; whether we're working shoulder to shoulder, or 5,000 miles away, we should remain in sync.

Full-Stack Development

— DEVELOPMENT —

Simple. Clean. Bold. Elegant. Modern. Vivid.

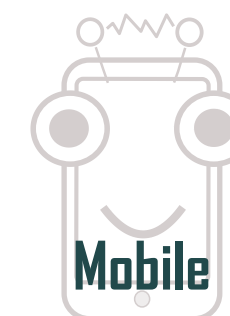

Contrary to popular belief, desktop software still exists, and I can assist your team with it's .NET applications, or jumpstart one.

Whether you need a standing website, a web application, or your looking for assistance with your team/independent project, i'd be happy to assist you.

Windows Presentation Foundation (WPF)
Windows Communication Foundation (WCF)
Structured Query Language (SQL)
Language Integrated Query (LINQ)
Extensible Application Markup Language (XAML)

More than half of the world's web activity occurs on a mobile device, which means you'll probably want your content available in a clean, intuitive and compact design.

At times, websites need to be moved onto new platforms, especially in regards to our ever evolving technology cycle. This, along with updating your content, is something I can do.
